AP Literature Summer Reading

*Pachinko* by Min Jin Lee

As you read the book, you will notice that the author uses untranslated Korean words in her text. These words are usually in *italics*. I have counted at least 70 different untranslated Korean words.

Select 10 of these words. For each, translate that word into English and then explain in a few sentences why that word is important to a character in the novel and/or how it is important to the plot or theme of the novel.

Have this assignment typed and completed the first day we return to school.
